

PRESS RELEASE

New name, new focus: Digital Solutions business line at WTS Klient

The business advisory firm strengthens its digital transformation portfolio with new services and expert appointments

Budapest, 9 December 2025 – **The former Business Automation business line of WTS Klient Business Advisory Ltd. will continue under the name Digital Solutions, offering an expanded service package to support digital transformation. In addition to its existing portfolio, the renewed division now provides its own automated VAT return solution and welcomes new professionals with IT and tax-accounting expertise to serve its clients.**

WTS Klient – which offers tax consulting, accounting, payroll, financial and strategic advisory, state aid and HR services, as well as legal services in cooperation with WTS Legal Attorneys Association – has placed a strong focus this year and in 2026 on supporting companies in their digital transformation. The introduction of e-VAT, the mandatory use of digital signatures, and evolving tax authority requirements elevate the role of digitalisation to a new level: automation is no longer just a competitive advantage but an **essential condition for regulatory compliance**.

International background, local expertise

The WTS Klient Digital Solutions team **works with the professional support of WTS Digital Germany**, giving clients access to cutting-edge technological developments and software solutions that combine tax and accounting expertise with IT innovation.

Key service: M2M automated VAT return

One of the flagship services of the Digital Solutions business line is the company's own, internally developed M2M VAT solution, **designed primarily for large corporations managing numerous and complex transactions**. This customisable automation software, based on machine-to-machine data connection, simplifies VAT return processes significantly.

Tax experts equipped with IT knowledge

Within the new business line, WTS Klient has assembled a team that integrates **infrastructure, IT, and tax-accounting competencies**, ensuring the comprehensive design of digital financial and tax solutions.

The business leadership is provided by **Csaba Baldauf**, Partner and Head of the Digital Solutions business line, who has been part of WTS Klient since 2008 and has led the Financial Management business line since 2022, expanding it with major clients.

In professional management, Csaba Baldauf is supported by **Tamás László**, Director responsible for digital tax solutions. Tamás has been strengthening WTS Klient since 2004 and played a key role in developing the automated VAT return solution and the online RfP-tool developed in cooperation with WTS Global.

The IT expertise of the business line is ensured by **Zoltán Hegedűs**, CIO of WTS Klient. Holding CISA, CISM, CRISC, and CDPSE certifications, Zoltán joined the company in 2023 to address rapid growth linked to acquisitions and the integration needs of financial-IT systems. As CIO and professional supervisor of the Digital Solutions business line, he plays a pivotal role in defining digital transformation directions.

Efficiency and compliance in one solution

“The goal of the Digital Solutions business line at WTS Klient is to provide our clients with solutions that ensure regulatory compliance, tax optimisation, operational efficiency, and data security simultaneously. Beyond reducing administrative burdens, our services minimise error risks and guarantee that business decisions rest on reliable foundations,” emphasised **Zoltán Lambert**, Managing Partner of WTS Klient.

“This is made possible by an outstanding team of experts who support our clients throughout the digital transformation – with decades of domestic and international experience in taxation, accounting, and financial processes, complemented by up-to-date IT knowledge,” he added.

About WTS Klient

Founded in 1998, WTS Klient Business Advisory Ltd. is one of Hungary's leading consulting firms. In cooperation with WTS Legal Attorneys Association, it serves clients with nearly HUF 7 billion annual net revenue and a team of 370 professionals. According to the Budapest Business Journal's 2025/2026 Book of Lists rankings, the company is among the country's top five in tax consulting, accounting, payroll, and financial consulting services. WTS Klient is the exclusive Hungarian representative of WTS Global, a tax and financial advisory network present in more than 100 countries, enabling clients to establish connections with virtually all major economic and financial centres worldwide.
